

PRESS RELEASE

EREPLACEMENTS LAUNCHES LINE OF SEALED LEAD ACID BATTERIES COMPATIBLE WITH APC™ BACK UP SYSTEMS

Press Release — July 18, 2013 — For Immediate Release

Grapevine, TX — eReplacements, LLC, a leading co-manufacturer of replacement power products, has introduced a new line of sealed lead acid back up batteries as of July 1st 2013. The Premium Power sealed lead acid batteries are compatible with the most popular versions of APC™ uninterruptible power supply (UPS) systems. eReplacements compatible batteries offer the same form, fit, function and power as the OEM battery and are compatible with APC Back-UPS™ and APC Smart-UPS™.

“With over 20 million APC™ UPS units sold we knew there was a market for these replacement batteries to offer consumers a choice. APC™ UPS systems are the most popular UPS’ in the world for servers, storage and network power protection, trusted to protect critical data and equipment from power problems by supplying clean and reliable network-grade power. The compatible batteries we offer versus the OEM will save our customers money and insure an uninterrupted power supply,” explains Tom Peck, President of eReplacements.

The eReplacements UPS batteries come with a 12 month warranty and will meet or exceed the original battery specifications because they are manufactured for high performance using the most up to date safety and engineering control standards.

About eReplacements:

For more than 8 years, eReplacements has co-manufactured a broad line of replacement power products including replacement batteries for laptops, power tools, digital and mobile devices as well as replacement lamps for projectors and TVs. The quality, safety and reliability of all products are of paramount importance. eReplacements stands behind the safety and craftsmanship of all of their products with UN rated safety certificates, UL rated materials and post production QC processes, demonstrating the high ethical standards of the company. eReplacements only sells to resellers and are available for distribution through Tech Data, Ingram Micro, D&H and AB Distributing.
